

Mock-up Cabin & Check-in Areas 2017-18

At J.A.R.E. Airline Training Partnership we have an unrivalled experience, over many years, of building mock-up cabins and check-in areas as well as providing airline, airport and aviation support equipment which has been successfully used in over 200 colleges & schools across the UK and Overseas.

We offer a range of both full mock-ups like the stunning example below as well a range of half mock-up cabins & check-in areas as alternatives to match with an institution's specific budget, space and other considerations.

Fuselage exterior of Full Mock-up Cabin

Interior of full mock-up cabin

Forward view of cabin interior

Interphone handset & PA system + touch-screen

Interactive PSU's controlled by touch-screen

Unique touch-screen technology for cabin functions

Unique pneumatically opened cabin door

We can build you a range of Mock-up cabin options which are shown on the following pages – just ask us for your specific requirements. Full Mock-up Cabin can be shipped & fully installed to most places worldwide. Smaller options are listed below.

These are just a few examples of the many options we can offer; we can also offer a range of electronics to recreate a range of emergency and service simulations to replicate active aircraft cabin environments i.e. active PSU's, interphones, touch screen control panel and many more options.

Examples of both Full & Half Mock-up Cabins & Check-in Areas

Example of a four row mock-up cabin within a classroom – we can provide these fully built, delivered and installed to worldwide destinations

Example of a larger mock-up across a classroom – we can provide these fully built, delivered and installed to worldwide destinations

Other mock-up cabin options in smaller classrooms with two class seating

More examples of Half Mock-up Cabins & Check-in Areas

Example of a four row mock-up cabin and central aisle within a classroom

Larger Half Mock-up Two Class Cabin + Check-in Set-up with Security Arch

Our Boeing B737 Trainer Aircraft - we can supply similar aircraft and/or cut down sections & sizes i.e. cut to floor etc., including mock-ups & actual Flight Deck sections these can be made to specific requests based on our own B737 Flight Deck shown above.

We can also provide CEET's/CST's on B737 options.

Other examples of Half Mock-up Cabins & Check-in Areas

Example of a leather four row mock-up cabin Gravity Conveyor + LED/Scales

**Two examples of check-in areas (one with mock-up cabin) in a larger base-room
These are just a few of the 114 mock-up examples we have built over the last 27 years.**

We can also install in all our mock-ups an interactive touch-screen PLC system which can also be remotely controlled by a Tutor via a wi-fi enabled tablet device, PC or Laptop etc., to activate and/or simulate a whole range of cabin scenarios for interactive student teaching and is very flexible. The system represents the latest aircraft technology to be found on aircraft such as the Boeing B787 Dreamliner for example.

A range of tasks can be achieved on the multi-page Touch-screen FAP system (see page 1) inc:-

Controlling the sound system

Controlling the Passenger Service Units inc: Call Bells, No Smoking, Fasten Seat Belts and Reading lights + alerts and re-setting

Controlling any heating in the area and/or signifying the temperature

Controlling the lighting (if any) including the ability to dim LED lights

Controlling a range of sound effects including in-flight, emergency scenarios, call bells

Controlling the Interphone handsets and PA via the handsets

Controlling any emergency exits signs

Additionally a range of extra bespoke options can also be built.

For more information, ideas and help with your own specific mock-up cabin and/or check-in area requirement, please contact: Andrew N.S. Easton: ☎ 01202 582354 e-mail: anse@jare-atp.co.uk
