

Mock-up Cabin & Check-in Areas 2023

At J.A.R.E. Airline Training Partnership we have an unrivalled experience, over 33 years, of building mock-up cabins and check-in areas as well as providing airline, airport and aviation support equipment which has been successfully used in over 200 colleges, universities, schools and aviation training centres across the UK and Overseas.

ALSO WE UPGRADE, REFRESH AND MAINTAIN EXISTING MOCK-UP CABINS!

We offer a range of full mock-ups like the stunning example below (just a few others are featured later from our extensive range) as well a range of cut-away, midi and half mock-up cabins **+ our *UNIQUE Starter options*** & check-in areas with alternatives to match a college's specific budget, space & other considerations. ***If you have the will to consider a mock-up cabin we will find a way for it to become a reality sooner than you think!***

Our Mock-up Cabin prices range from £12,500 to over £125,000 – we can always match something to your budget, adding on items later if required

We can build you a range of Mock-up cabin options which are shown on the following pages – just ask us for your specific requirements. **Full Mock-up Cabins can be shipped & fully installed to most places worldwide.** Smaller Half & Midi options are listed below.

These are just a few examples of the many options we can offer; we can also offer a range of electronics to recreate a range of emergency and service simulations to replicate active aircraft cabin environments i.e. active PSUs, interphones, touch screen control panel and many more options via our unique **Forward Attendant Panel** controlled PLC system.

Examples of a Cut-away + Full & Half Mock-up Cabins & Check-in Areas

Example of a Cut-away four row mock-up cabin within a classroom – this included a rear full width galley, FAP/HMI system, full electronics, PSUs and Exit/ACP indication + lighting

Example of a larger mock-up across a narrow classroom to create a full mock-up feel – we can provide these fully built, delivered and installed to worldwide destinations

A Half Mock-up cabin with two class seating – with flight deck and door images

A range of Mock-up Cabin starter options

One college went from the image on the left to start with and then we installed this cut-away on the right hand side, utilising the original seating

A starter option with seating, small galley, jumpseat and interactive PA/Interphone

Refurbishment & upgrade – this mock-up was very worn, damaged and was totally lacking in any interactive features AND in a very sorry state – look at it now!

Modern seating, interactive electronic features, PA/Interphone & up-to-date lighting

Check-in Area examples

Examples of both twin desk and double desk check-in options

An example of a double check-in area and two types of Security Arch (AMD)

These are just some of the 136 Mock-up cabin and Check-in Area examples we have built over the last 33 years.

We can also install in all our mock-ups an interactive touch-screen PLC system which can also be remotely controlled by a Tutor via a wi-fi enabled tablet device, PC or Laptop etc., to activate and/or simulate a whole range of cabin scenarios for interactive student teaching which is very flexible. The system represents the latest aircraft technology to be found on aircraft such as the Boeing B787 Dreamliner for example.

A range of tasks can be achieved on the multi-page Touch-screen FAP system (see page 1) inc:-

Controlling the sound system

Controlling the Passenger Service Units inc: Call Bells, No Smoking, Fasten Seat Belts and Reading lights + alerts and re-setting

Controlling the lighting (if any) including the ability to dim LED lights

Controlling a range of sound effects including in-flight, emergency scenarios, call bells

Controlling the Interphone handsets and PA via the handsets

Controlling any pathway marking or emergency exits signs

Additionally a range of extra bespoke options can also be built into our Touch-screen electronic systems

For more information, ideas and help with your own specific mock-up cabin and/or check-in area requirement, please contact: Andrew N.S. Easton: ☎ 01202 582354 e-mail: anse@jare-atp.co.uk
